Education

Stony Brook University

Stony Brook, New York

Bachelor of Science in Computer Science, GPA: 3.58

2023

Relevant Coursework: Software Engineering, Data Science, Full-Stack Development, Algorithms, Game Programming

Technical Skills

Computer: JavaScript, Python, TypeScript, HTML, Java, CSS, C, C#, C++, SQL, Kotlin, MATLAB

Tools: React, Android Studio, Node.js, Godot, Unity, Git, SQL, MongoDB, Pandas, Figma, Canva

Skills: Machine Learning, Artificial Intelligence, Agile Process

Certifications: JPMorgan - Software Engineering Job Simulation (Forage), Wells Fargo - Software Engineering Job Simulation (Forage), Walmart - Advanced Software Engineering Job Simulation (Forage), Commonwealth Bank - Software Engineering Job Simulation (Forage), Quantum - Software Engineering Job Simulation (Forage), Google IT Support Professional Certificate

Professional Experience

Varsity Tutors

Remote

Computer Science Tutor

2025 – Present

Pear Deck Tutors

Remote

Computer Science Tutor

2023 – 2025

- Developed and delivered engaging Java/Python programming lessons to high school and college students, demonstrating excellent communication skills
- Educated hundreds of students improve their understanding of complex programming concepts, leading to enhanced academic performance as evident by 5 star ratings on my profile at Varsity Tutors

Projects and Certifications

JPMorgan - Software Engineering Job Simulation (Forage)

2026

Relevant Coursework: SQL Database, Backend Development, Kafka, REST API, Spring Boot

Google IT Support Professional Certificate

2025

Relevant Coursework: Troubleshooting, System Administration, Cybersecurity, Operating Systems, Networking

Devil's Advocate, Independent Project

2024

- Worked on a comedic adventure game as part of Ludum Dare 55 Jam
- Built a virtual novel type game from scratch using the Godot engine alongside five teammates
- Wrote the majority of the code base including a well-designed custom dialogue manager system that led to our success as ranked in the top 25 out of over 2000 submissions

Tileslate, Capstone Project

2023

- Built an online level editor with full-stack functionality in JavaScript in a team of four
- Utilized MERN stack technology to build a platform for users to collaboratively build and share 2D game maps
- Developed the back-end code using the MERN stack, facilitating seamless API requests/responses for collaborative tileset and map creation
- Worked on the front-end UI/UX design using React, streamlining customer experience and shared user content on our platform

Us and Them, Stony Brook University's Ren'Py Competition 2023

2023

- Created a visual novel that won first place as part of SBU's Ren'Py Competition
- Personally wrote all the Python code and co-wrote the story
- Impressed the judges with my technical merits, including Tom Rothamel, creator of the Ren'Py engine
